May 20, 2022

Property Owner included in Resolution 250

RE: Residents impacted by Talbot County Resolution 250 - Project update

Dear Property Owner,

Talbot County is pleased to provide you with an update on the status of the County's work on Resolution 250, which will bring sanitary sewer to your area. Century Engineering, the County's consultant for this sewer expansion project, has completed drawings and specifications for Phase I of the project, and has submitted the plans to the Maryland Department of the Environment (MDE) for approval. As indicated in previous correspondence, Phase I of the project involves the installation of sanitary sewer force mains (e.g. the pipes) in public and private road rights-of-way. Valves will be installed at each property line for future connection. The actual connection of each property to the force main will be completed during Phase II.

The current timeline for Phase I is as follows: project construction goes out for bid in October 2022; construction initiated in early 2023 with completion anticipated in approximately one year.

In addition, design for Phase II is underway, and the County looks to begin connections in early 2024. The County is continuing to work on the financing part of this project, applying to the State for Revolving Loan Fund and loan forgiveness funding, as well as to Senators Cardin and Van Hollen for Federal Earmarks, in an effort to obtain as much funding as possible in the way of grants. As more information on funding is received, we will continue to update you. In the meantime, please visit the project website at www.talbotcountysewer250.com for information.

If you have any questions please feel free to contact my office at 410-770-8170.

Sincerely,

Ray Clarke, P.E.
Talbot County Engineer

cc. Clay Stamp, County Manager
Andy Jakubowitch, P.E., Century Engineering
Jean Weisman, Talbot County Sanitary District Administrator
